

Dear Neighbour,

I'm releasing a male brushtail,
And Titan is his name.
Obviously this boy was found in a shed,
But that's not his claim to fame.
Titan came in before Christmas,
A very sick little creature -
His eyes and skin were both very sore
Missing fur was his main feature.
Now his eyes are clear and bonny,
Thanks to Australia Zoo,
And his skin is pink and healthy,
Thanks to the local vets too.
He still has several bare patches,
On his legs and on his 'touché',
He just needs time to grow his fur
While he's living in the bush.
He comes from the end of Junction Road,
So you're liable to see him at night,
And as long he's strong and healthy,
Try not to give him a fright.
He's ready to have another go
At living on his own.
But if you think Titan needs some help
Don't hesitate to phone.
